

A Very Incomplete Zampanio Knowledge Sheet Made By Someone Who Learned About This Less Than One Month Ago. (The Macaroni Project)

By MemeBot

BACKGROUND: i made this because i told a friend that i could know “everything” about Zampanio in a round three weeks (in my defence, i had only been looking into Zampanio for a day or two at the time i said it, and didn’t know it was practically infinite), and then immediately regretted it once i looked into the code (and how many links there are) a little more.

If your wondering why there are three docs, it's because this one is basically for which characters belong to what universes (plus info on the characters sometimes). Document 2 is just for links. And idk what i was thinking when i made doc 3, but it's basically just more links.

Does this need to be organized better? Yes. Should I have put more info in all of the blanks, because I said I would know “everything”? Yes. Was I far too cocky to claim I could do it in a relatively short amount of time for someone without thoroughly researching exactly what I was getting myself into (plus school)? Absolutely yes. And do I know better than to do it again? I sure hope so. But ladies, gentlemen, anyone in between or outside those labels. I give you:

The Echidna universe (by JR and IC)

People:

JR (used to be jadedResearcher, and is more recently justifiedRecursion [I think] [got it from ZampanioSimSim]) (because I don't know what to do about one for Zampanio, and one for Echidna): "JR stole the names of everyone except those from lobotomy corp" {eyedolgames, obsessions.js}
"also, hello! thanks for reading my code :) i call people who read (or better yet, CHANGE) my code "Wastes" because the game i'm making is essentially wasted on you (you're skipping the regular progression) but i wouldn't want you to be bored so i make sure theres enrichment for you in the code" (TruthSim, truth.js) thank you for enriching my time reading the code JR (I genuinely really enjoy it)
