If you wanna contribute here, feel free. I'm making a game based on Zampanio so the more info you guys add on it the more accurate I can be in my simulation. Surely nothing could possibly go wrong just simulating it right? Right???

SmeargleUsedHex

Literally no one is in the wiki besides JR and me. Come on, guys.

oh, I help out with another wiki, if you need formatting help and stuff

redirects are #redirect [[page title]] or #redirect [[page title#section name]]

gotta make sure it's the very first line though, before anytime else

#redirect [[Alleged copies]]] alleged copies

gone_farther

aj

now it's too few

kit [ey/em]

there we go

gotta do it in source mode too, make sure there's no extra stuff added

if there's <nowiki> tags in source mode, that's it telling the wiki not to listen to formatting

The Wiki is a map and a map must be updated with the paths.

Can you teach those stuck on the wiki how to find the paths?

The Wiki hungers for the story of how you have found Zampanio. Sim or not, your Testimony is desired.

The Herald could claim this space:

/NORTH/NORTH/NORTH/NORTH/NORTH/EAST/SOUTH/SOUTH/SOUTH/NORT

NotAMinotaur

Being in a space is not the same as claiming it. How would one go about claiming a space? How did the Weaver?
